

Documentation Guidelines for Medical Conditions and Other Physical Disabilities:

Students with a medical or physical disability are required to submit documentation prior to receiving accommodations or services. These guidelines describe the necessary components for acceptable documentation from your health care provider. A evaluation report dated within the last six months performed by a qualified, licensed healthcare provider should include the following information:

- A diagnosis of the medical condition, its severity, and related medications and treatments
- A summary and date of the most recent evaluation and diagnostic tests or criteria used to make the diagnosis
- A brief history and current status of the condition and its expected duration or progression
- How the condition currently interferes with or causes significant limitations in a college setting
- A list of accommodations that have been provided in the past
- A list of accommodations that are recommended to address these specific functional limitations and their rationale
- The health care provider's name, title, address, phone number and signature

Students are encouraged to provide their care providers with a copy of these guidelines.
