

Temporary Medical Conditions

Documentation Guidelines:

Students who are temporarily disabled by injury, severe illness, surgery or other medical conditions may be eligible for temporary adjustments to address functional limitations. Students are required to contact a learning specialist at Access Resources and Access Resources will collaborate with other departments to coordinate services. Documentation needs to be submitted prior to receiving accommodations or services. These guidelines describe the necessary components for acceptable documentation from your health care provider. A recent report performed by a qualified, licensed healthcare provider should include the following information:

- A diagnosis of the medical condition, its severity and related medications and treatments
- A brief history and current status of the condition and the expected duration and progression
- How the condition currently compromises or causes significant limitations in the college setting
- A list of recommended accommodations to help alleviate the symptoms or functional limitations of the condition
- The health care provider's name, title, address, phone number and signature

Students are encouraged to provide their care providers with a copy of these guidelines.
